

**Solo Vario-stiff masts**  
**Your passport to Solo Success**

A new range of variable stiffness Solo rigs help you to match your sailing weight with wind and weather conditions.

For the new 2016 sailing season Super Spars are launching a new range of Solo rigs using the proven Olympic medal winning M7+ mast section.

With three different weights of mast tube and easily interchangeable multi length sleeves that can be easily changed to suit sailing, wind and sailing conditions this is the ultimate Solo mast.

The mast sections are available in standard tube weight ranges from light, medium and heavy.

Sleeves can be easily fitted and interchanged by removing ten screws sliding the sleeve out and sliding in your chosen sleeve.

Three sets of sleeves can be purchased – any combination can be provided:
